COLOR SELECTION CHART

24 Gauge Materials are stocked in **Galvalume** and **Fluoropon (Kynar 500)** finishes

26 Gauge Materials are stocked in **Galvalume** and **WeatherXL Siliconized Polyester** finishes

29 Gauge Materials are stocked in a **Galvalume** finish

A-Lert's stock colors are readily available and are our best value in terms of pricing. These colors may be available in other finishes or in other gauges by special order. Other colors are also available by special order.

*** PLEASE NOTE:** *Special order colors, finishes, or gauges may affect pricing and delivery lead time.*

Actual colors may vary slightly from the samples shown and these colors may not match colors from other companies despite the color names being identical. For an exact color match, please request an actual color chip. Uniformity of appearance of unpainted Galvalume sheets cannot be guaranteed due to normally occurring variations in color, sheen, texture or spangled appearance.

Film thickness on painted material is 1.0 mils nominal (+/- 0.2 mils) on the finish color, 0.5 mils nominal (+/- 0.1 mils) on the reverse side, and all thicknesses include primer. All painted material has an off white, polyester backer on the reverse side.

A-Lert Building Systems and A-Lert Roof Systems are divisions of Centurion Industries, Inc.
